2024 Forum for Gradate School Educational Reform Outline

[Schedule]

November 15, 2024 (Friday) 13:10-18:00 (Reception: 18:15-19:30) November 16, 2024 (Saturday) 9:00-12:15 (Awardee Luncheon: 12:30-14:00) *Additionally, networking time at the corporate booths is scheduled (15th 10:00-12:50, 16th 12:30-14:00)

[Venue and Format]

Nagoya University Higashiyama Campus

* The event will be conducted in-person. Some programs on the 15th will be broadcast online.

【Main Theme】

"PhDs, Change the Future"

[Purpose]

Currently, Japan faces severe challenges such as population decline, economic stagnation, and global issues like climate change. To address these challenges, it is essential for PhD holders with high expertise and broad transferable skills to lead societal transformation. Graduate schools have the mission of nurturing highly skilled "knowledge professionals" who will shape the future of society and the economy.

As part of the government's graduate school policy, various initiatives have been implemented since the GCOE program since 2002, including the Leading Graduate School Programs since 2011 and the Doctoral Program for World-leading Innovative & Smart Education (WISE Program) since 2018. To connect these pioneering programs' initiatives and outcomes with overall graduate education reform in Japan, the " Forum for Gradate School Educational Reform" has been held since 2021.

In 2024, Nagoya University will host the "2024 Forum for Gradate School Educational Reform - PhDs, Change the Future". During the planning, we emphasized understanding what is necessary and valuable for PhD students who will lead the "future." As a result, we concluded that it is crucial to expand and concretize the students' vision of their "future" and take action towards building a social foundation where PhD holders can fully demonstrate their abilities.

This forum aims to provide opportunities to hear from graduates of the Leading Graduate School Programs and the WISE Program who are active in various fields, and to interact directly with organizations considering hiring PhD talent. Additionally, we will create a platform for PhD students to propose how PhDs can thrive in society, and to engage in dialogue with universities, companies, and relevant ministries. We hope participants will directly witness the high expertise of PhD students and the excellent transferable skills they possess.

We expect this forum to be a catalyst for changing the "future" of PhD professionals and for PhDs to change the "future"

[Program (Tentative)]

November [•]	15	(Friday)	- Day 1
